## DETAILED ACTION

\*\*\* This office action is in response to Applicant's Amendment filed 02/12/04, in which Claims 1-28 were canceled. Claims 29-36 are pending.

### *Allowable Subject Matter*

1. Claims 29-36 are allowed.
2. As already of record, the following is an examiner's statement of reasons for allowance: None of the references of record including Murayama (5,412,533), Kudoh et al (5,117,332), Nakamura et al (5,483,415) fairly anticipatively suggest a method for forming a semiconductor device comprising all process limitations as claimed, or in the combination of the references, to fairly make a *prima facie* obvious case of the claimed invention as recited in claim 29, wherein neither references teach or suggest linearly coating said masking material solution around the entire circumference and heating the solution to form the first masking layer; subjecting an area where a solid electrolyte is formed later to electrochemical forming; further linearly coating the masking solution around the entire circumference at a distance from the first masking layer on the electrochemically formed metal material, and heating the solution to form the second masking layer; forming a solid electrolyte in the area exclusive of the spacer between the masking layers out of the area subjected to the electrochemical forming; and cutting the metal materials in the space between the first and second masking layers.
